SUMMARY

Third-year software engineering student at Arba Minch University. I build full-stack apps and tools, and I test web apps for security gaps. Looking for a software development internship, with a growing focus on cybersecurity.

EDUCATION

BSc in Software Engineering
Arba Minch University
third year, in progress

SKILLS

Languages
C, C++, Java, JavaScript, Python

Web
HTML, CSS, React, Tailwind, Bootstrap, Node.js

Databases
PostgreSQL, Supabase

Security
penetration testing, Linux, networking, privilege escalation

Tools
Git, GitHub, Docker, Burp Suite, Nmap

PROJECTS

NexEye
Linux command-line tool that checks the public side of your own domain, flags the gaps to fix first and saves proof for each finding.

LiveSync
Browser karaoke platform: upload music, sync lyrics, record vocals and replay performances.

YouTube Analytics Bot
Telegram bot that shows channel stats on demand.

RC4 File Encryptor
C++17 file encryption and decryption with the RC4 cipher (educational).

TRAINING

INSA Summer Camp (CTC)
Cybersecurity Trainee (5th Batch) hybrid program
